Changing the Environment of Mobility

As part of our continuing commitment to helping the environment, SMART has introduced electric vehicles to operate within our transit system. Four state-of-the-art vehicles operate on a zero-emissions platform and provide reduced air and noise pollution.

Other advantages include:

- **Cleaner**
Reduces emissions and improves air quality
- **Quieter**
Better rider experience
- **Made in the USA**
By the nation's top designers and engineers

Plugging Into Smarter Solutions

Our Oakland facility serves as the main hub for electric vehicle charging and maintenance. The plug-in station powers two buses simultaneously and provides maximum strength within four hours. Furthermore, mechanics from each SMART terminal possess the knowledge and skill to manage the advanced energy storage and technology.

- **Lower operating costs**
Simpler design & lighter materials
- **Long Range Battery**
Up to 150 miles on a single charge
- **Lower maintenance costs**
Due to electric battery technology

As Always, it's All About the Customer

This latest step toward carbon free mobility means that every time you choose SMART, you are investing in a better ride, a better community and a better future. It also reinforces our commitment to provide an economic advantage and environmentally safe transit to the 76 communities we serve.

- **Smarter Technology**
Each bus is equipped with WiFi, security cameras and on-board digital signage to enhance the riders' experience.
