Here's what to know about Coronavirus

You've likely heard about the Coronavirus (officially called “2019-Novel Coronavirus” or “COVID-19”) in the news. While the immediate health risk remains low to Americans and there isn't a vaccine yet, there are still ways that you can help prevent the spread of this virus.

To prevent the spread of this illness or other illnesses, including the flu:

- Wash your hands often with soap and water,
- Cover your mouth and nose when you cough or sneeze,
- Stay home when you're sick, and
- See your doctor if you think you're ill.

Visit The Centers for Disease Control website for more information on the Coronavirus, including what you should know about symptoms, treatments, testing, and other frequently asked questions.
