Independent Auditor's Report

To the Board of Directors
Suburban Mobility Authority for Regional Transportation

We have audited the basic financial statements of the Suburban Mobility Authority for Regional Transportation (the "Authority") as of and for the year ended June 30, 2019 and have issued our report thereon dated November 12, 2019, which contained an unmodified opinion on those basic financial statements. Our audit was conducted for the purpose of forming opinions on the financial statements as a whole. We have not performed any procedures with respect to the audited financial statements subsequent to November 12, 2019.

The accompanying schedule of expenditures of federal awards and the reconciliation of basic financial statements federal revenue with schedule of expenditures of federal awards are presented for the purpose of additional analysis, as required by the Uniform Guidance, and are not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

November 12, 2019
Independent Auditor's Report

To Management and the Board of Directors
Suburban Mobility Authority for Regional Transportation

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States, the financial statements of the Suburban Mobility Authority for Regional Transportation (the "Authority") as of and for the year ended June 30, 2019 and the related notes to the financial statements, which collectively comprise the Authority's basic financial statements, and have issued our report thereon dated November 12, 2019.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Authority's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Authority's internal control. Accordingly, we do not express an opinion on the effectiveness of the Authority's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the Authority's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies, and, therefore, material weaknesses or significant deficiencies may exist that were not identified. We did identify a certain deficiency in internal control, described in the accompanying schedule of findings and questioned costs as Finding 2019-001, that we consider to be a material weakness.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Authority's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

The Authority's Response to the Finding

The Authority's response to the finding identified in our audit is described in the accompanying schedule of findings and questioned costs. The Authority's response was not subjected to the auditing procedures applied in the audit of the financial statements, and, accordingly, we express no opinion on it.
To Management and the Board of Directors
Suburban Mobility Authority for Regional Transportation

Purpose of This Report
The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the Authority's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

November 12, 2019
Report on Compliance for Each Major Federal Program and Report on Internal Control Over Compliance Required by the Uniform Guidance

Independent Auditor's Report

To the Board of Directors
Suburban Mobility Authority for Regional Transportation

Report on Compliance for Each Major Federal Program

We have audited the Suburban Mobility Authority for Regional Transportation's (the "Authority") compliance with the types of compliance requirements described in the U.S. Office of Management and Budget (OMB) Compliance Supplement that could have a direct and material effect on the Authority's major federal program for the year ended June 30, 2019. The Authority's major federal program is identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal program.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of the Authority's major federal programs based on our audit of the types of compliance requirements referred to above.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (the "Uniform Guidance"). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the Authority's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the Authority's compliance.

Opinion on Each Major Federal Program

In our opinion, the Authority complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on the major federal program for the year ended June 30, 2019.
To the Board of Directors  
Suburban Mobility Authority for Regional Transportation

Report on Internal Control Over Compliance

Management of the Authority is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the Authority's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Authority's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Note 1 - Basis of Presentation

The accompanying schedule of expenditures of federal awards (the “Schedule”) includes the federal grant activity of the Suburban Mobility Authority for Regional Transportation (the “Authority”) under programs of the federal government for the year ended June 30, 2019. The information in the Schedule is presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (the “Uniform Guidance”). Because the Schedule presents only a selected portion of the operations of the Authority, it is not intended to and does not present the financial position, changes in net position, or cash flows of the Authority.

Note 2 - Summary of Significant Accounting Policies

Expenditures reported in the Schedule are reported on the full accrual basis of accounting. Such expenditures are recognized following, as applicable, the cost principles contained in Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, wherein certain types of expenditures are not allowable or are limited as to reimbursement. Pass-through entity identifying numbers are presented where available.

The Authority has elected not to use the 10 percent de minimis indirect cost rate to recover indirect costs, as allowed under the Uniform Guidance.

Section II - Financial Statement Audit Findings

Reference Number | Finding
--- | ---
2019-001 | Finding Type - Material weakness

Criteria - General ledger activity should be recorded in accordance with accounting principles generally accepted in the United States of America.

Condition - Journal entries were necessary to adjust certain account balances in order to properly state them as of June 30, 2019.

Context - The vast majority of all transactions were properly accounted for by the Authority; however, our financial statement audit procedures did detect necessary adjustments to grants receivable, capital assets, and beginning net position.

Cause - The Authority did not have processes in place to reconcile and review these statement of net position accounts.

Effect - As a result of these balances not being reconciled as of the end of the year, the Authority's grants receivable, capital assets, and beginning net position required adjustments as of June 30, 2019. The Authority has posted the proper adjustments.

Recommendation - We recommend the Authority implement procedures to ensure all statement of net position accounts are reconciled as of the end of the year. Rather than being just an accumulation of the transactions posted throughout the year, the ending balances should be reconciled to supporting records. Grants receivable should agree to the sum of reimbursements requested during the year for which cash was not received until after year end and revenue earned but not yet requested for reimbursement as of the end of the year. To make the reconciliation process easier as of the end of the year, we recommend the Authority ensure reimbursements are being requested on a timely basis, cash receipts are received timely, and cash receipts are posted against the appropriate receivable accounts. Capital assets, including construction in progress, should agree to the detailed records of all capital assets. The sum of net position accounts should agree to the ending net position recorded in the financial statements as of the previous year end.

Views of Responsible Officials and Planned Corrective Actions - The Authority is in the process of hiring an accountant in lieu of a financial assistant to distribute the grant accounting workload. This hiring will ensure that grant accounting is done on a timelier basis. This hiring will also allow for the incumbent capital and general ledger accountant to analyze internal reports concerning capital assets and construction in progress amounts. Furthermore, the manager of governmental accounting and accounts payable has developed a checklist that will assist in following up during the monthly closing process to insure that all grant receivable and capital asset activity is invoiced, recorded, reconciled, and analyzed monthly.

The manager of financial reporting and budget has developed a net position reconciliation report to be annually included in the Authority's financial audit workpapers. This reconciliation will analyze all adjustments made to the financial net position ending and beginning account balances. This analysis will insure that ending net position from the prior year reconciles with the beginning net position of the audit year.
